

RedTitan Document Designer - PDF

Intuitive design tool with data merge to create dynamic PDF files

No programming skills required

Create a professional looking business document, merge your database files and produce a PDF all with the powerful yet simple to use RedTitan Document Designer - PDF. A windows application for creating anything from a business letter, customer bill or financial contract. Merge your customer data right on screen and output directly to a PDF file. *It's that simple.*

The Intuitive design interface is used to produce sophisticated dynamic layouts with scalable fonts, shaded areas, lines, boxes, graphics, in black & white or full colour.

Use a PDF or image as the document backdrop or simply design your own.

From its simple graphic interface, you can build complex documents adding data driven conditions into the layout so that the resulting document varies with each data record for a 1:1 marketing messages.

Features like background forms, font control and an image library ensures a consistent 'look & feel' across your documents. Dynamic layout, colour and content ensuring your message is clear, accurate but customised to your audience.

Easily represent data as a graphical object such as a barcode, chart or graph.

Unlike other design applications the "RedTitan Document Designer - PDF" allows precise placement of all elements and accurate alignment help keep consistency from one document to another.

Data can be accepted as either database extracts (e.g. XML, CSV) or plain ASCII text files.

Merge and view the template and data directly within the application and output as a fully composed PDF document at the press of a button.

Good design applications don't need to be hard to use.
